

PROFEN visioMAX

Welcome to Profen visioMAX Software

Profen visioMAX is designed to outline the commercial benefits of the solutions, and assure you of our commitment to delivering stable, functional software and support.

Profen visioMAX includes specialized solutions for vehicle maintenance.

UNIQUE APPROACH

Profen visioMAX is committed to providing applications with a level of service and support that gives you unrivaled value for money. Profen visioMAX policies help customers reduce the financial risk and disruption associated with system changes. The result is a set of reliable solutions that work every day and ensure a high level of customer confidence and satisfaction.

OUR COMMITMENT

Our goal is to help you succeed in your business. That means increasing your revenue and reducing costs, while maintaining quality and improving control. Profen visioMAX can help you do this in two ways.

First, by providing features that help you regulate and discipline processes within your organization.

Second, by collecting, sharing and reporting data that enables proactive decision-making, and provides instant snapshots of your organizations performance.

Our goal is to provide you with the solutions you need to run your business more profitably.

PROFEN

What is Profen visioMAX Maintenance, Repair & Overhaul Software (MRO)?

Profen visioMAX is a configuration based MRO.

It is specifically designed for vehicle maintenance activities of all sizes. The software provides a strong but flexible backbone for your entire business operation and is available in a variety of versions to reflect the size of your business.

Who Uses Profen visioMAX MRO?

MRO is designed to meet the needs of organizations that perform any or all of the following tasks:

- Part-145 Vehicle Maintenance
- Component / Engine Overhaul
- Piece-part Repair and Overhaul

The Profen VisioMAX MRO modules include:

- Maintenance Engineering
- Line Maintenance
- Heavy Maintenance
- Inventory Management
- Shop Maintenance
- Calibration Management
- Reliability Reports
- Dashboard
- Technical Library Management
- Mobile / Wireless Device Support
- S1000D Standart Compliant Functions

What Makes Profen visioMAX MRO Different?

- It is a platform and database independent Java application.
- Profen visioMAX MRO is a business-oriented web-centric solution that can be installed on-premise to optimize your internal infrastructure, or on-demand, Software as a Service (SaaS) in our secure data center to provide a modern and reliable deployment with predictable annual costs.
- Worldwide secure access is granted to authorized users within your company, through a web browser. The powerful multi-layered architecture and Service Oriented Architecture (SOA) provide a unique set of tools that minimize the risk of technology obsolescence while addressing the need to remain flexible, adaptable and scalable to leverage your technology investment to strengthen your competitive advantage.

Key Benefits

Complete Ease of Use

All Profen visioMAX modules have the same true Windows 'look & feel', and even the most complex processes can be handled with a series of intuitive steps. Profen visioMAX MRO screens have a consistent layout, so users can quickly learn and adapt to new features. It is a web based software developed with Java. It can be accessed via the Internet from anywhere, including mobile devices.

Efficient Data Entry

Profen visioMAX's data entry screens ensure that users fill in the information they need. Almost all screens have 'drill-down' functions that allow easy and intuitive access to other relevant information.

Process-Led Functionality

The rich functionality of our solutions accurately reflects the needs of our users. Each application is designed to follow a logical sequence that aligns with processes within the business, ensuring greater discipline, clarity and control.

Increased Speed & Security

The Profen visioMAX software is designed to leverage data entered elsewhere in the organization, improving accuracy and reducing unnecessary duplication of data and input effort. The PostgreSQL database features stability and minimal downtime.

Commercial Advantages

Profen visioMAX provides you with the data you need to identify the strengths and weaknesses in your business, and act accordingly. Improve your cycle times, reduce your costs, improve your margins, reduce disputed invoices, improve your cash-flow.

Technical Benefits (Flexibility & Scalability)

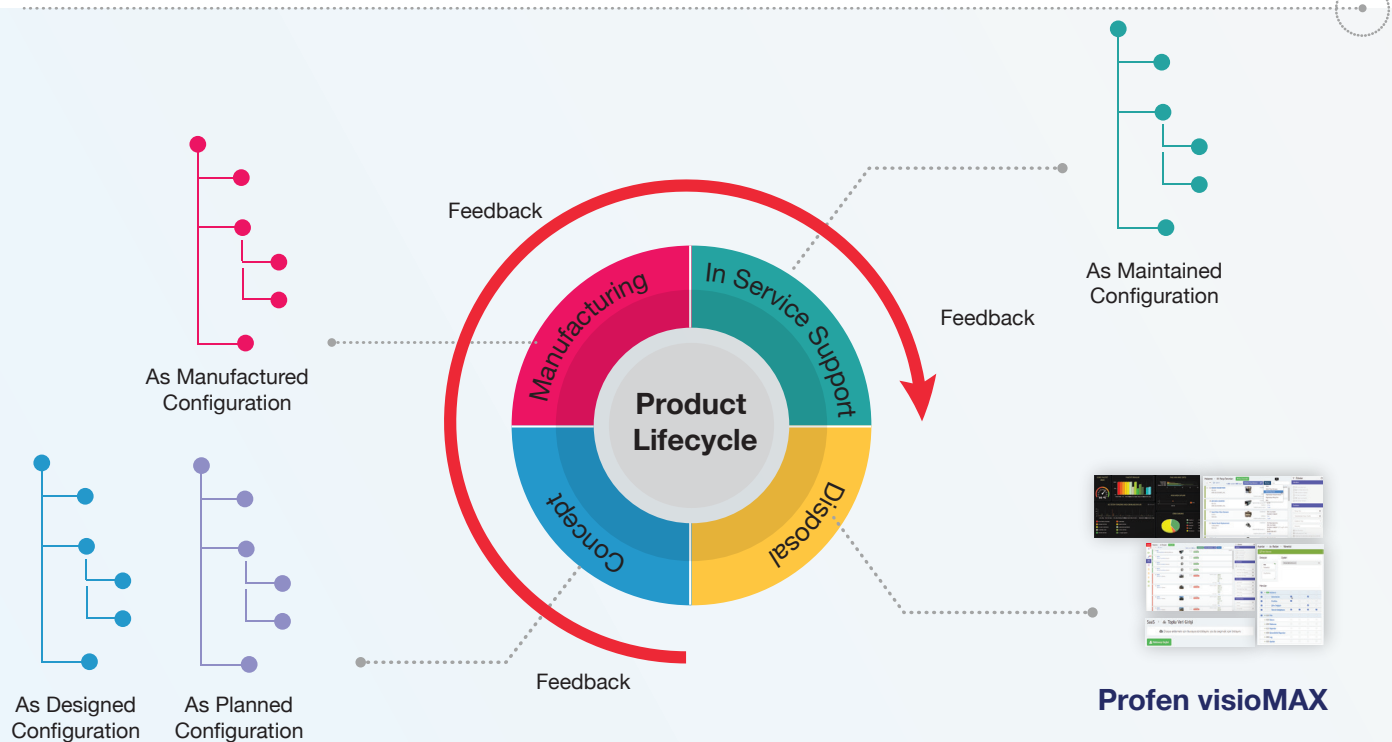

With Profen visioMAX you can choose the solution components that meet your business goals and operational needs without losing the ability to add more components as your growing business requires more functionality. MMIS's scalable architecture ensures that your solution is right-sized for your business.

Reliable Data

Controlled data input ensures reliable output. Profen visioMAX solutions use a set of defaults that control the integrity of the information entered, and ensure that no vital data is overlooked, reducing the possibility of costly errors and improving quality.

Profen visioMAX Product Life Cycle

Configuration Management

Vehicle template and actual configuration management; template configuration refers to the logical set of tracked items managed in a tree data structure, actual configuration refers to the installation / removal of series parts and assigned maintenance tasks.
